

## LEARNING OBJECTIVES

- » Identify the different types of interior moveable glass wall systems and how each contributes to space, daylighting and acoustics
- » Recognize configurations, space requirements, and design
- » The integration of independent structural support and track systems ensuring safety, flexibility, and longevity
- » Variety of finishes available for interior glass wall assemblies

## EARN AIA CREDIT

### 1 Learning Unit (LU)

- » Health, Safety & Welfare (1 LU / HSW)

## HUFCOR PRESENTS

### Interior Movable Glass Wall & Storefronts

Acoustic Glass Wall • Frameless Glass Wall • Timber-Framed

Hufcor, manufacturer of the world's most used brand of operable partitioning systems, presents our AIA / CES program, "Interior Movable Glass Wall & Storefronts." The program covers the variety of movable glass wall configurations currently available. Learn how glass wall systems achieve their acoustical ratings and how their use may earn points for LEED® accreditation.

For more information or to schedule a "lunch and learn" presentation, please contact your Hufcor representative. Go to [www.hufcor.com](http://www.hufcor.com) and click on "Representatives".
